

INTERNATIONAL PAINT MAKES SANDING EASY

International Paint has just released a new product that will make achieving a smooth, even finish even easier; it's called Sanding Guide Coat.

When you are sanding a white or light coloured surface you are more or less sanding blind as you cannot see where you have or haven't sanded or how well you have sanded any particular area.

This is more so when sanding in sheds where lighting is poor. Consequently you end up sanding more by feel rather than by eye until the surface 'feels' smooth.

However, sanding and scratch marks will probably still be present. When you apply the next coat of paint these marks can print through and if you are at the top coating stage then they can easily ruin an otherwise excellent finish. Sanding Guide Coat aids the human eye by highlighting fine scratches into easily visible blue lines that can be sanded away as you progress from coarse to fine sand paper.

- It only contains solvents known not to affect the surfaces of our cured paints eliminating any changes of surface wipe marks or other defects printing through
- The product will not dissolve most cloths so there is very little chance of any rag residue being deposited onto the surface
- The special colour pigment used has a high surface permeability that will more readily show up scratches, sanding marks, cracks and other defects you are trying to highlight
- The chosen colour also has a high visibility for easy removal
- Application of the product is by cloth which is easy and as the product dries almost instantly it can be applied as you go
- The product contains no trace residues which might remain on the surface leading to flow problems, pin holing or delamination. Once you have removed the blue colour nothing is left
- Consistent colour, strength and performance.

Sanding Guide Coat comes in a 1L size and with a coverage rate of about 50sqm per litre it's a very economical product. For further information contact International's free helpline on 1800 251 431 in Australia and 0800 808 807 in New Zealand or visit www.yachtpaint.com.
